WHY CHOOSE MAJESTIC STONE?

THE SOURCE

Your projects and customers matter to us. And that's why we quarry. For over 20 years, Majestic Stone has been quarrying some of the finest natural Tennessee flagstone in the region but we only do this to control the source and create a dependable and consistent supply chain to our distributors. Direct access to the source and fabrication facility, creates a faster and more reliable process than others. This access to supply coupled with a knowledgeable team, gives us the ability to service projects and distributors from coast to coast.

CRAFTSMANSHIP

We are not just stonework professionals; we consider ourselves craftsmen. With over two decades of passion for our craft, Majestic Stone operates a state of the art fabrication facility utilizing the latest equipment in the industry to produce high quality products for architects and designers across the country. Our veneer saws, jaguar saws, flooring saws, breakers and tumblers, give us the ability to achieve the finished product you desire no matter the application.

LEGACY

Stonework is about the memories we make – Grandchildren's feet patterning on the cobblestones, the family's laughter echoing through the house, friends gathered around the outdoor fireplace. The stories we'll remember, in places that last. The quality, durability, and authenticity of natural stone are values we hold dear. From our quarry to your home, let's build a legacy that stands the test of time.

IT'S ABOUT MORE THAN JUST STONE.

Over the past 20 years, Majestic Stone has been blessed with opportunities to supply stone to high end jobs all across the country. We take pride in our work but at Majestic Stone, it's about more than just stone... It's about the people and relationships behind the stone that truly matter. The producers and fabricators. The drivers. The distributors and wholesalers. The contractors and masons. And most importantly, the homeowner or business owner that enjoys the stone in its final destination. Over the past two decades, we've been blessed to work with great people and look forward to the next 20 years as we grow new relationships and continue to build on the ones we have.

CAMERON HARBOR™

THIN VENEER

Thin Veneer is a relatively new product to the stone industry that allows natural stone to be installed where full veneer cannot be used or is too difficult to install. Thin veneer weighs roughly 1/4 the weight of full veneer and is cut to approximately 1" thick. At Majestic Stone, we have thin veneer products using flagstone and fieldstone, with variations of sawn top and bottom, tumbled, and splitface to create unique and custom designs exclusively designed and fabricated at our facility in Chattanooga, TN. If you can't find a design that fits your taste, contact your sales representative and they will work with you to create a one of a kind blend to fit specifically for your home or project.

Lead Times on Accessories: We are happy to sell exact quantities. 4 pallets of any single stocking product will be ready within 2 weeks of PO. A full truck load of a single stocking product will take 4 weeks. Please call for lead times on custom orders. **Please call for lead times on Natural Top Brown Accessories as these lead times vary**										
Color Range is predominately thought to be either brown or grey. Brown color range will include shades of tan, buff, rust, and occasional pink. Grey color range consists of lighter to darker greys along with shades of blues. From time to time, our natural stone color ranges will blend and the grey material will have some brown tones in it and likewise with the brown. If the color range needs to be specific, please clarify on the PO as this will effect lead times and pricing.										
Landscaping Stone
