CAMERON HARBOR™

THIN VENEER

Thin Veneer is a relatively new product to the stone industry that allows natural stone to be installed where full veneer cannot be used or is too difficult to install. Thin veneer weighs roughly 1/4 the weight of full veneer and is cut to approximately 1" thick. At Majestic Stone, we have thin veneer products using flagstone and fieldstone, with variations of sawn top and bottom, tumbled, and splitface to create unique and custom designs exclusively designed and fabricated at our facility in Chattanooga, TN. If you can't find a design that fits your taste, contact your sales representative and they will work with you to create a one of a kind blend to fit specifically for your home or project.

*** Custom Cuts - All accessories are available in custom dimensions and finishes. Custom cut pieces are quoted by job so please call for lead times and pricing ***									
Color Range is predominately thought to be either brown or grey. Brown color range will include shades of tan, buff, rust, and occasional pink. Grey color range consists of lighter to darker greys along with shades of blues. From time to time, our natural stone color ranges will blend and the grey material will have some brown tones in it and likewise with the brown. If the color range needs to be specific, please clarify on the PO as this will effect lead times and pricing.
