Majestic
STONE

The Majestic Stone Difference.

The Source

Your projects and customers matter to us. And that's why we quarry. For over 20 years, Majestic Stone has been quarrying some of the finest natural Tennessee flagstone in the region, but we only do this to control the source, and create a dependable and consistent supply chain to our distributors. Direct access to the source and fabrication facility creates a faster and more reliable process than others. This access to supply coupled with a knowledgeable team, gives us the ability to service projects and distributors from coast to coast.

Craftsmanship

We are not just stonework professionals, we are craftsmen. With over two decades of passion for our craft, Majestic Stone operates a state of the art fabrication facility utilizing the latest equipment in the industry to produce high quality products for architects and designers across the country. Our veneer saws, jaquar saws, flooring saws, breakers, and tumblers, give us the ability to achieve the finished product you desire no matter the application.

Legacy

Stonework is about the memories we make - Grandchildren's feet pattering on the cobblestones, the family's laughter echoing through the house, and friends gathering around the outdoor fireplace. The stories we remember in the places that last.

It's About More Than Stone.

Over the past 20 years, Majestic Stone has been blessed with opportunities to supply stone to high end jobs all across the country. We take pride in our work but at Majestic Stone, it's more about than just the stone... It's about the people and relationships behind the stones that truly matter. The producers and fabricators. The drivers. The distributors and wholesalers. The contractors and the masons. And most importantly, the homeowner and business owner that enjoys the stone in its final destination. Over the past two decades, we've been blessed to work with great people and look forward to the next 20 years as we grow new relationships and continue to build on the ones we have.

We are here to serve,

Patrick Wells
